

7.11.08 Donius response to Benson memo

Mr Benson

- I mailed copies of the manifests for the scrap metal disposal to you today. I included a copy of the manifest for the waste oil pickup.
- The concrete rubble is being disposed of to a ranch in Valley Center where it is being used as the base for a road. About half of the rubble is gone.
- The empty drums and cylinders are still in the holding area.
- All trucks and vehicles were cut up and disposed of as scrap.
- All sampling test results arrived yesterday. Jody at Boogay's office is sending these to you via email.

Marvin

Benson.Craig@epamail.epa.gov writes:

I did receive your e-mail dated 7/1/08. I still require more specifics as to certain activities:
 Total number of loads of scrap metal (comprised of) delivered to Ecology Scrap and Steel in Oceanside, CA. I either need a copy of the receipts or a table listing the volume and dates delivered. Same for any scrap metal delivered to any other entity.
 Fate of the concrete rubble. Is it moving off-site or still in a pile?. How much?
 Status of empty drums and cylinders?
 Status of vehicles and trucks (specific as to numbers,). How many moved off-site and to where?
 I must have a copy of the oil manifest (Asbury) and copies of any other shipping papers to date ASAP. My mailing address is below. Please FedEx if necessary

I need a copy of all analytical data reports resulting from the 6/14 sampling effort as soon as they are available (even before Mr. Boogay consolidates the information in a report). This is time critical as information flow to the Tribe and stakeholders must occur. Oftentimes, laboratory data, including QA data is available from the laboratory, please check.

For any activities not yet accomplished, describe them with a proposed timeline for completion.
